## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3641

1. Applicant's election without traverse of invention I directed to a firearm including barrel, firing chamber, and internal firearm indicia in the reply filed on 2/10/2005 is acknowledged.

Claims 6-14 are withdrawn from consideration as being directed to non-elected inventions. Claims 1-5 and 15-20 are directed to the elected invention and an action on these claims follows.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 and 15-19 rejected under 35 U.S.C. 102(b) as being anticipated by Ramsey.

Ramsey discloses a firearm comprising:

- |  |                               |
|--|-------------------------------|
| a) a firearm firing chamber;   | 21                            |
| b) firearm indicia formed on the internal surface of the firing chamber; | see fig. 13                   |
| c) a predetermined pattern that includes serial numbers; and             | page 2, lines 70-96           |
| d) a trigger, frame, and barrel.   | page 1, lines 12-13,<br>91-92 |

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3641

5. Claims 5 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ramsey in view of Zemsky.

Ramsey applies as previously recited. However, undisclosed is an indicia raised from a recessed surface to a level generally even with the internal surface. Zemsky teaches an indicia raised from a recessed surface to a level generally even with the internal surface (col. 5, lines 5-13). Applicant is substituting one indicia arrangement for another in an analogous art setting. It would have been obvious to a person of ordinary skill in this art at the time of the invention to apply the teachings of Zemsky to Ramsey firearm and have a firearm with differently formed indicia.

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1-5 and 15-20 rejected under 35 U.S.C. 102(e) as being anticipated by Lizotte.

Lizotte discloses a firearm comprising:

- |  |              |
|--|--------------|
| a) a firearm firing chamber;   | see fig. 26B |
| b) firearm indicia formed on the internal surface of the firing chamber; | see fig. 26A |
| c) a predetermined pattern that includes serial numbers; and             | para. [0174] |
| d) a trigger, frame, and barrel.   | see fig. 22  |

Art Unit: 3641

8. Claims 1-5 and 15-20 rejected under 35 U.S.C. 102(b) as being anticipated by Atchison (446).

Atchison (446) discloses a firearm comprising:

- a) a firearm firing chamber; 5
  - b) firearm indicia formed on the internal surface of the firing chamber; see fig. 3
  - c) a predetermined pattern that includes serial numbers; col. 1, lines 6-13
  - d) a trigger, frame, and barrel; and col. 1, lines 26-29
  - e) recessed relative to an internal surface with indicia raised col. 3, lines 10-15
- to substantially the level of the internal surface.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Atchison (100), Adams, Pocoroba, Mikola, and Smith disclose other state of the art firearms with associated indicia.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen M. Johnson whose telephone number is 703-306-4158. The examiner can normally be reached on Tuesday through Friday.

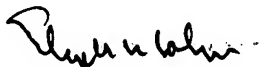

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Carone can be reached on 703-306-4198. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9326 for regular communications and 703-872-9327 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-306-4177.
